COMPANY

change your gauges,
carbide from steel...

...and see your profits
climb up the hill

mg
MGPL

MGPL Gauges, work for ages.

STEEL STEALS !

Steel business is still business! We say this because steel gauges covertly steal your profits. One tends to think of them as the cheapest alternative as their cost of purchase is lowest. However, the aspect of their age is never taken into consideration and unknowingly, the profit margin is slashed down.

STEEL VS CARBIDE GAUGE

■ STEEL GAUGE
 ■ CARBIDE GAUGE

LIFE (DAYS) COST PARTS / GAUGE

■ STEEL GAUGE	23	549	625
■ CARBIDE GAUGE	574	1010	11958

STUNNING OBSERVATION

Gauge cost per component with **steel gauge** was **0.87 Ps.**
 Gauge cost per component with **MGPL Carbide Gauge** was **0.08 Ps.**

Carbide Heals !

Carbide business is wide business! The reason behind this confident exclamation is the longer life of a Carbide Gauge. It has been proven, that "Carbide Gauges live 20 times longer than the Steel Gauges." This comparison shows that Carbide Gauges are extremely economical (to be precise, 11 times) than Steel Gauges.

Welcome Carbide, Bye Bye Steel

The evidence is here. The Graphical representation given beside by one of our satisfied customers proves the economical advantage of the Carbide Gauge.

CARBIDE GAUGES ARE THE BEST, BUT WHAT IS EVEN BETTER?

Simple answer MGPL Carbide Gauges, the best gauges among the Carbide ones. Not one or two, but there are 6 strong reasons, why the MGPL Carbide Gauges are the best.

ISO 9001

Every product at MGPL has to live up to the ISO 9001 standard, by passing through the rigorous inspections at every stage with the best possible measuring instruments.

HIGH QUALITY MATERIAL

MGPL Carbide Gauges are manufactured from the 'wear resistant Carbide', made by either SANDVIK or WIDIA. In plug and ring gauges, extra wall thick Carbide is used to ensure dimensional stability. Our customer feedbacks often talk about the satisfying quality of the material.

PERSONAL TOUCH OF PRECISION LAPPING

Excellent surface finish is given to every product by the process of lapping that removes even a minute layer of unnecessary material. Our experienced lappers can practically feel even a micron. That is why most of our plain Carbide Gauges have a surface finish better than 0.05 μ Ra.

EXTRA LIFE

With our lapping process we can supply more than 90% of our plug/width gauges close to higher limit and in case of snap/ring gauges at lower limit. Every micron extends the life of our product.

INSPECTION AND TRACEABILITY

Every product is inspected in a standard room with the best of instruments. Each gauge is certified with traceability to NPL.

LONG EXPERIENCE

MGPL is the first to introduce Carbide Gauges in India and has been manufacturing them since 15 years.

MGPL Gauges, work for ages.
